**NEC DISPLAY SOLUTIONS INTRODUCES THE NEW MULTISYNC P SERIES
22-INCH WIDESCREEN DESKTOP DISPLAY**

Full-featured P221W Enhances Images, Increases Productivity

CHICAGO – October 23, 2008 – NEC Display Solutions of America, a leading standalone provider of professional LCD displays and projectors, introduced today its new MultiSync P Series with the 22-inch P221W LCD monitor, the first display in this new family of desktop monitors. The P221W offers professionals working in color-critical environments the opportunity to take advantage of a professional grade desktop display without breaking their budgets.

The P221W display can be seen at the Photo Plus Expo (Booth #263) today through October 24 in New York, NY.

“Built upon the success of the 90 series displays, the new MultiSync P Series has features specifically designed for the professional graphics user,” said Stan Swiderski, Product Manager for NEC Display Solutions.

Featuring hardware color calibration using the optional NEC Spectraview^{II} kit, the P221W delivers accurate color in a simple to use and affordable package. The kit includes an optimized calibration sensor based on the highly acclaimed X-Rite iOne Display v2.

A partial list of features of the MultiSync P221W includes:

- 1680 x 1050 native resolution
- Wide color gamut achieves 96% coverage of AdobeRGB
- Internal 10-bit programmable lookup tables (LUTs)

- S-PVA LCD technology provides for the widest viewing angles available with minimal off-angle color shift
- AmbiBright™ automatic brightness adjustment
- 1000:1 typical contrast ratio
- 16ms response time
- 300 cd/m² typical brightness
- XtraView+™ 178° (88°/88°/88°/88°) viewing angle
- ECO Mode™ and carbon footprint reduction
- Analog and digital input signal
- Four-way ergonomic stand (tilt/swivel/pivot/height-adjust)
- Optional Soundbar 90

The P221W features a 3-year limited warranty and will be available for December 2008 shipment with an estimated street price of \$636.90.

The SpectraView_{II} color calibration kit will be available in December 2008 with a customized sensor and software for wide gamut LCD displays with an estimated street price of \$374.99.
