

FOR IMMEDIATE RELEASE - (August 11, 2009)

Broadvox Announces Interoperability with NEC UNIVERGE® Communications Servers

NEC Communications Servers and Broadvox GO! SIP Trunking Deliver Scalable VoIP Business Solutions

Dallas, TX – 08.11.09 –Broadvox, a VoIP Communications pioneer since 2001, and NEC Unified Solutions, Inc. (NEC) today announced interoperability certification with NEC's UNIVERGE SV8100 and UX5000 IP communications servers. When Broadvox SIP Trunking is deployed in conjunction with either of the NEC communications servers, businesses can immediately enjoy the scalability, flexibility and added productivity enhancements delivered with IP communications.

From small home offices to large call centers, Broadvox GO! SIP Trunking launched with NEC's UNIVERGE IP communication servers delivers truly affordable IP communications with support for digital, wired and wireless networks. The robust features delivered via the SV8100 or UX500 can be shared between branch offices by linking multiple NEC communications servers together.

"NEC communications servers give customers the option of allowing phased migration to IP either by leveraging their existing migration or through immediate deployment to a pure IP solution," said Pete Sandrev, VP of Customer Experience at Broadvox. "When connected to a reliable and robust IP network like the one engineered by Broadvox, NEC's UNIVERGE solutions can help drive both short and long-term savings by combining enhanced productivity applications."

"We believe Broadvox has set the VoIP/SIP technology standard of excellence for years and we are pleased to have achieved certification with their SIP Trunking products," stated Jay Krauser, general manager, core solutions and engineering, NEC. "Successful completion of testing that includes over 60 separate elements of call processing gives us the confidence to assure our customers that our UNIVERGE SV8100 and UX5000 communications servers and Broadvox SIP Trunking will enable 'real-world' reliable communication with business VoIP."

NEC's award-winning UNIVERGE SV8100 Communications Server is an ideal IP telephony solution for SMBs that wish to compete and grow their businesses over time. This robust, feature-rich server-based solution supports voice, video and wireless communications, is completely scalable and can be deployed in both branch and remote offices.

The UNIVERGE UX5000 is a comprehensive integrated solution for smaller businesses designed to meet the unique challenges of both business telephony applications and VoIP. This top-performance system supports pure peer-to-peer IP telephony connectivity and advanced networking.

With Broadvox SIP Trunking, businesses enjoy up to 70 percent cost savings over traditional TDM trunks, along with unlimited domestic local and long distance calling and discounted international and toll-free calling. The Broadvox GO! product line provides for business continuity during a crisis or company growth and geographical distribution to eliminate or reduce the number of PRIs and branch office PBXs. GO! SIP Trunking includes E911, DIDs and Local Number Portability, allowing businesses to keep their current phone numbers.

About Broadvox

Founded in 2001, Broadvox is a worldwide leader in providing integrated managed VoIP services to SMB, enterprise, and carrier customers. It has deployed one of the largest full-featured global VoIP networks and is trusted by more than 200 telecommunications carriers, ASPs, ISPs, and over 3,000 businesses to transport over 8 billion minutes annually. The Broadvox Network Operations Center operating 24x7 provides the reliability, security, and quality of service required by the world's most discriminating customers. Broadvox offers SIP Trunking, SIP origination and termination services, and hosted communications solutions. Broadvox is headquartered in Dallas, Texas.
